

4 key AL RF Controller

Features and Benefits

4-key RF controller adopts the advanced micro control unit, it is used for controlling a variety of lamp whose source of light is LED. For instance, point source of light, flexible light strip, wall washer lamp, glass curtain wall light and so on; it has many advantages such as low price, easy connection and simplicity to use. Meanwhile, you could adjust brightness, static color choices and various dynamic changes in lighting effects through wireless remote control. And according to the actual need of customers, it can carry out jumpy changing, gradual changing, stroboflash and other effects of change.

Technical Parameters

Working temperature	-20-60°C
Supply voltage	DC5V, 12V~24V optional (specify the required voltage on orders)
Output	3 channels
Connecting mode	common anode/cathode optional (specify the required voltage on orders)
External dimension	L130*W64*H24 mm
Packing size	L137*W80*H54mm
Net weight	185g
Gross weight	215g
Static power Consumption	<1W
Output current	<4A(each channel)
Output power	5V:<60W, 12V:<144W, 24V:<288W

Code & Reference

20640001 4-key AL RF Controller

Warranty

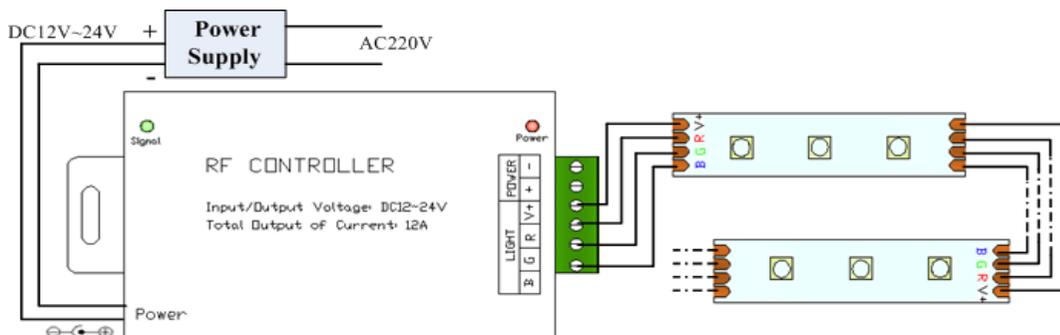

2 years

Dimensions

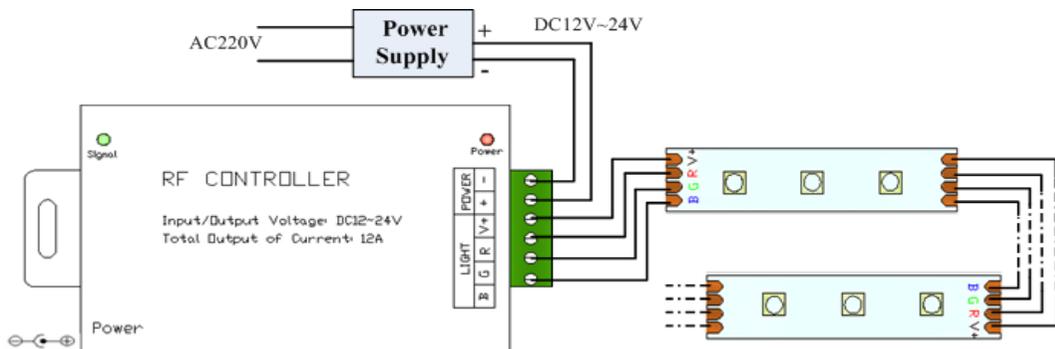

Connection Diagram

Application Circuit 1

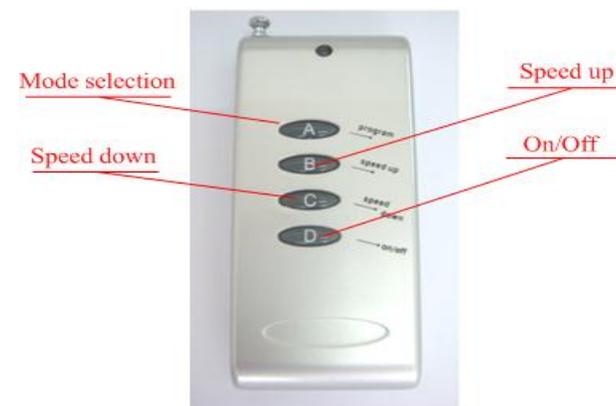

Application Circuit 2

Direction for use

1. Connect the load wire at first, following by the power wire; Please ensure short circuit can not occur between connecting wire before you turn on the power;
2. Adopt wireless control method, 4 keys in total, function of each button as below:

Symbol	Button Name	Instruction
	(A)Program	The style/color function key. You can choose different color changes, each press one time, change a light style.
	(B)Speed up	No use
	(C)Speed down	No use
	(D)On/off	The output switch, turn on or off the controller output at any state.

- Each press, the green light flash one time, indicating that has entered the next state
- Standard color changes as follows:

No	Patterns	Remarks
1	Static 	
2	Static 	
3	Static 	
4	Static 	
8	Four-color fade changing	20 minutes a cycle

Operation

Power input interface (port1):

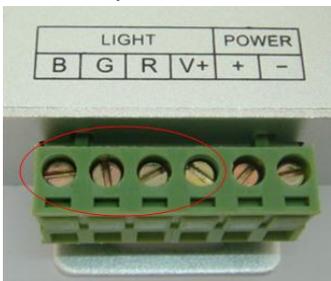

Adopt conventional power transposon as a DC power input interface.

Power input interface (port2):

Adopt male and female connector with screw.

Load output interface:

Adopt male and female connector with screw.

Safety Information

1. Supply voltage of this product is DC12V~24V, never connect to others or AC220V.
2. Wireless Remote Control is powered by DC12V battery, if Stretch the antenna, it would Control better.
3. Lead wire should be connected correctly according to grade that connecting diagram offers.
4. If the load is more, by way of port 2 to connect the power will be better.
5. This product is not to overload;
6. Warranty of this product is two years, but exclude the artificial situation of damaged or overload working.

Common Problems

Problems	Possible cause	Solution
1. Lamp does not light after power	Power cord is not properly connected, or there is not output switching power supply	Connect the power cord properly or replay the power
	Lamp power cord is not connected or short circuit	Connected lighting power cord
2. After connecting some of the load the controller does not work	The connected load is too large, so that it has burned in some of the components of the controller	Replace parts of components or replace the controller

Packing
